Reviews

Comprehensive manual! Its this sort of excellent read through. We have read through and i also am certain that i will going to read through once more again later on. You wont sense monotony at at any time of your time (that's what catalogs are for regarding in the event you question me).

(Prof. Geraldine Monahan)

INTEGRATED NEUROSCIENCE

Book Condition: New. Publisher/Verlag: Springer, Berlin | A Clinical Problem Solving Approach | INTEGRATED NEUROSCIENCES This textbook takes as a premise that, in order to make intelligent diagnosis and provide a rational treatment in disorders of the nervous system, it is necessary to develop the capacity to answer the basic questions of clinical neurology: (1) Where is the disease process located? (2) What is the nature of the disease process? The purpose of this textbook is to enable the medical student to acquire the basic information of the neurosciences and neurology and most importantly the ability to apply that information to the solution of clinical problems. The authors also suggest that hospital trips be a part of any Clinical Neurosciences Course so that the student can put into actual practice what he has learned in the classroom. We believe that this textbook will be of value to the student throughout the four years of the medical school curriculum. Medical, psychiatry and neurology residents may also find this text of value as an introduction or review. It is more true in neurology than in any other system of medicine that a firm knowledge of basic science material, that is, the anatomy, physiology and pathology of the nervous system, enables the student and physician to readily arrive at the diagnosis of where the disease process is located and the nature of the most likely pathology. Subsequently that knowledge may be applied to problem solving in clinical situations. | Preface. Dedication. Section I: Introduction to Basic Neurobiology. 1. Overview of the nervous system. 2. Overview of localization of function and neurological diagnosis. 3. Neurocytology. 4. Neuroembryology. 5. Basic Physiology. Section II: Regional Approach to Neuroanatomy and Localization. 6. Skeletal Muscle and Nerve-Muscle Junction. 7. Spinal Cord: Structure and Physiology. 8. Disease of Peripheral Nerve...
