John Wiley and Sons Ltd. Paperback. Book Condition: new. BRAND NEW, Sampling of Populations: Methods and Applications - Solutions Manual (4th Revised edition), Paul S. Levy, Stanley Lemeshow, A trusted classic on the key methods in population sampling-now in a modernized and expanded new edition Sampling of Populations, Fourth Edition continues to serve as an all-inclusive resource on the basic and most current practices in population sampling. Maintaining the clear and accessible style of the previous edition, this book outlines the essential statistical methods for survey design and analysis, while also exploring techniques that have developed over the past decade. Rather than employ a heavily mathematical approach, the authors present illustrative examples that demonstrate the rationale behind common steps in the sampling process, from creating effective surveys to analyzing collected data. Along with established methods, modern topics are treated through the book's new features, which include: * A new chapter on telephone sampling, with coverage of declining response rates, the creation of "do not call" lists, and the growing use of cellular phones * A new chapter on sample weighting that focuses on adjustments to weight for nonresponse, frame deficiencies, and the effects of estimator instability * An updated discussion of sample survey data analysis that includes analytic procedures for estimation and hypothesis testing * A new section on Chromy's widely used method of taking probability proportional to size samples with minimum replacement of primary sampling units * An expanded index with references on the latest research in the field All of the book's examples and exercises can be easily worked out using various software packages including SAS,...
