## Clinical Management of Motor Speech Disorders in Children (Hardback)

---

By -

Thieme Medical Publishers, United States, 1999. Hardback. Book Condition: New. 254 x 180 mm. Language: English . Brand New Book. Speech-language clinicians who work with children have for a long time had trouble obtaining clinical reference material designed specifically for children. This comprehensive book furnishes the reader with a complete source of information on assessment, treatment, and management strategies for children with developmental apraxia, dysarthria, and stuttering. A Brandon-Hill Selection. Special features of this work include: More extensive coverage of several topics including pediatric dysphagia and management of disfluency as a motor speech disorder Contributing writers are clinicians actively working with children An innovative chapter on an integrated treatment approach in developmental apraxia Discussion of treatment efficacy issues, a particularly timely topic This timely book integrates neuroanatomical and neurophysiological development issues with speech motor control and motor learning as a basis for treatment planning and service provision. Written by some of the leading clinicians and researchers in the field, it presents a strong theoretical framework to view cases within, but also provides real clinical practical information. Plus, information is presented in a manner that is easily applied by clinicians and students.

### Reviews

*I just started off reading this article pdf. It is probably the most remarkable ebook we have go through. It is extremely difficult to leave it before concluding, once you begin to read the book.*

-- **Jeanette Kreiger**

*Extensive guideline! Its this kind of very good study. It really is full of knowledge and wisdom I discovered this book from my i and dad encouraged this publication to understand.*
