Excerpt: . has to pull down the bucket to make it descend into the well; the counterbalance assisting him in hoisting up the bucket when full; and thus, by apportioning his efforts, he doubles his effective force at the time he needs it. The application of the pole as a lever for moving weights, or for turning dver the trunk of a tree, might suggest its further use, combined with a rope, to obtain mechanical power; the author has seen old seamen, in case of need, resort to such a contrivance, and make, as they termed it, a purchase, with a plain wooden roller (part indeed of a firtree trunk), a rope, and two handspikes, and, by the skilful combination of these materials over a hatchway, accomplish what the united strength of all hands failed to effect without such assistance. A little in advance of...
